# A “FULL SERVICE” since 1965! —

Lourens van der Spruijt, our father and founder of Elvedes registered his own business with the Chamber of Commerce on February 8, 1965. He started with parts for mopeds, such as cables, sprockets, chains, pistons, buddy seats etc. Stock was kept under his bed and in his Opel Rekord. His first sale was one day later at a bike shop Staals in Utrecht.

For several years he visited bike shops directly to make sales. The demand for cables was remarkably high and it seemed this was something to put his focus on. Soon, Lourens started to assemble brake, throttle, clutch and speedometer cables for mopeds himself in his mother's kitchen. Elvedes changed from a moped parts trading company into a control cable business for mopeds and bicycles. Because there was no time left to

visit bike shops, he decided to work together with wholesale partners, who took care of the distribution for the Elvedes aftermarket cables. Besides aftermarket there was a large OEM market for brake and shift cables for bicycles.

In 2002 it was time for us, the next generation, to run the Elvedes business. We, his twin sons Carl and Peter, who were 24 years old at the time, started to find out where Elvedes was standing after 37 years, and where it had to go for the years to follow. We decided to put more focus on aftermarket and less on OEM products. Making the Elvedes brand bigger and stronger gives the company more certainty and continuity for the future. Besides cables, there were so many more service parts for bicycles which would be a perfect addition to expand the brand.

# INDEX

First, we started to add rim and disc brake pads. Not only the most wanted, but also the exotic brake pads. If you want to be a “full service” aftermarket brand, you must add the full range and help your customer to find the right Elvedes product by providing “easy to find” product posters and “how to use” online videos. The market was enthusiastic, and from that point we started to extend the Elvedes WWproduct range step by step. Nowadays, there is a large assortment of Elvedes service parts for bicycles, which find their way all over Europe and further afield. All this success is achieved with a great team of Elvedes employees, our hard-core production partners and our professional distribution partners.

For the upcoming years, Elvedes will update and innovate their current product range, but will also expand with new product groups to highlight the “full service” brand that we are.

**We believe that “full service” are the keywords to success. “Full service” to our Elvedes team, since our team is the most valuable part of our company. “Full service” to our production partners, because only together can we create the best products for the best price, and “full service” to our distribution partners, whose needs we are always trying to fill and make the Elvedes brand a significant asset for their businesses.**

# DISC BRAKE PAD GUIDE

## HOW TO EXTEND THE LIFETIME OF YOUR DISC BRAKE PADS

Bed-in disc brake pads extend the life span of the pads considerably! Squeeze them in carefully and ensure that the pad just audibly touches the brake disc for approximately 100 metres at a speed of  $\pm 25$  km/hour. Now squeeze a little harder on the brake so that the speed decreases to approximately 5 km/hour, and then slowly increase the speed while gently squeezing the brake. Repeat this 10-12 times and the pads are worn in. Never brake to a stop with the brake still squeezed in order to prevent damage to the rotor. Always bed-in the front and rear brakes separately.

## WHY ELVEDES DISC BRAKE PADS?

Elvedes believes that offering 3 different compounds can satisfy all riders in different circumstances with different bikes. Our compounds are compatible with all brands and types of stainless steel rotors on the market and will give you the brake power you will need. In the overview below, the performance of each compound is simply explained to easily make the right choice of disc brake pads.

### ORGANIC (RESIN) COMPOUND

Excellent for gravel bikes, racing bikes and trekking bikes

### METALLIC CARBON (SEMI-METAL) COMPOUND

Excellent for E-bikes, cargo bikes and delivery bikes

### SINTERED (METAL) COMPOUND

Excellent for mountain bikes

## ORDER QUANTITY

All organic, sintered and metallic carbon disc brake pads have a steel backplate.

### XXXX -CARD

All disc brake pads can be ordered per card, containing 1 pair.

Necessary pins and clips included with all types of disc brake pads on card.

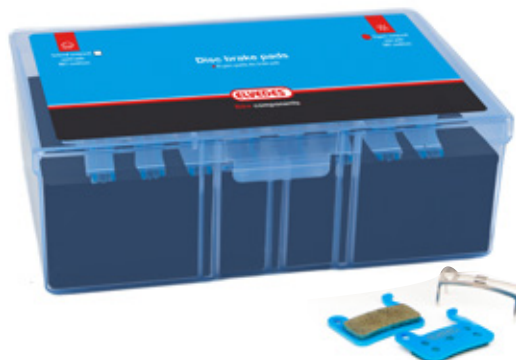

### XXXX -BOX

Selected disc brake pads can be ordered per box, containing 10 pairs.

### XXXX -BOX25

Selected disc brake pads can be ordered per box, containing 25 pairs.

# RIM BRAKE PAD GUIDE

## ☀️ BLACK COMPOUND

- For steel and aluminium rims
- Developed for dry conditions
- Excellent for city bike / trekking bike / racing bike

## ☁️ BLACK/RED COMPOUND

- For steel and aluminium rims
- Developed for wet conditions
- Excellent for MTB

## ☀️ ☁️ 📢 WHITE COMPOUND

- For steel and aluminium rims
- For more brake power
- Developed for dry and wet conditions
- Excellent for E-bike / racing bike / BMX

## ☀️ ☁️ BLUE COMPOUND

- For carbon rims only
- Developed for dry and wet conditions
- Excellent for racing bike / BMX

## ORDER QUANTITY

### XXXX -CARD

All rim brake pads can be ordered per card, containing 1 pair.

### XXXX -BOX

Select rim brake pads can be ordered per box, containing 25 pairs.

# OUTER CABLES

## VOLUME BOX

All Elvedes outer cables have MoS<sub>2</sub> enriched liner for lower friction and higher performance.

The outer cable volume boxes come with an easy pull reel made of 100% recycled and 100% recyclable plastic.

The boxes are also equipped with a unique GripClip, which prevents the outer cable from slipping back into the box after cutting.

The cable type is indicated by the letter A, B, C or D

Brake cable

Braided brake cable

Shift cable

Braided shift / brake cable

### SHIFT Ø4,1

# PULLEY WHEELS

## 2 × 10 TEETH

CP2017231

ABEC 3 with extra grease

1 set

Stainless sealed bearing

Including spacers compatible with:

A - Shimano 8 speed

B - Shimano 7 speed, Campagnolo 8 speed

C - Campagnolo 9 / 10 speed

D - SRAM (one hole upper pulley) 9.0SL ('98) / 9.0 ('97 - '98) / 7.0 ('97 - '98) / 5.0 ('98 - '99)"

## 2 × 11 TEETH

CP2017086

ABEC 3 with extra grease

1 set

Stainless sealed bearing

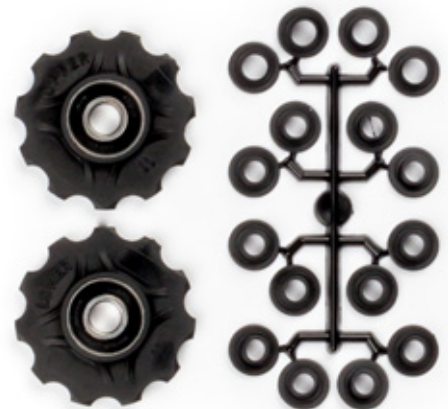

Including spacers compatible with:

A - Shimano 8 / 9 / 10 / 11 speed

B - Shimano 7 speed, Campagnolo 8 speed

C - Campagnolo 9 / 10 speed

D - SRAM 7.0 / 9.0 ('97 - '99)"

## 2 × 11 TEETH

2017086-BOX

ABEC 3 with extra grease

10 sets

Stainless sealed bearing

Including spacers compatible with:

A - Shimano 8 / 9 / 10 / 11 speed

B - Shimano 7 speed, Campagnolo 8 speed

C - Campagnolo 9 / 10 speed

D - SRAM 7.0 / 9.0 ('97 - '99)"

## 2 × 11 TEETH

CP2017100

ABEC 5 with extra grease  
1 set  
Stainless sealed bearing

Compatible with:  
Shimano 9 / 10 / 11 speed  
SRAM X0 / X9 / X7 9 speed MTB > 2011  
SRAM X0 / X9 / X7 10 speed MTB  
SRAM Apex / Rival / Force 10 speed road  
(bushing included)  
Campagnolo 11 speed

## 2 × 13 TEETH

CP2019103

ABEC 5 with extra grease  
1 set  
Stainless sealed bearing

Compatible with:  
Shimano RD-M9100 / M8100 / M7100

CP2017101

ABEC 5 with extra grease  
1 set  
Narrow / wide  
Stainless sealed bearing

Compatible with:  
SRAM X01 / XX1 / X1 GX 1×11 speed  
SRAM Rival 1 / Force 1 1×11 speed

## 12 + 14 TEETH

CP2017102

ABEC 5 with extra grease  
1 set  
Narrow / wide  
Stainless sealed bearing

Compatible with:  
SRAM Eagle XX1 / X01 / NX / SX / GX 1×12 speed  
and 2×11 speed MTB

## 2 × 12 TEETH

2020097

ABEC 5 with extra grease  
1 set  
Narrow / wide  
Ceramic hybrid bearing

Compatible with:  
SRAM Force / Red eTap AXS

## 12 + 14 TEETH

2020098

ABEC 5 with extra grease  
1 set  
Narrow / wide  
Ceramic hybrid bearing

Upgrade for:  
SRAM Force / Red eTap AXS

# BOTTOM BRACKET GUIDE —

A bottom bracket shell can be threaded or non-threaded, called thread fit and press fit respectively. It is important to know which type of shell you're working with and what the shell diameter and width are, in order to select a fitting bottom bracket.

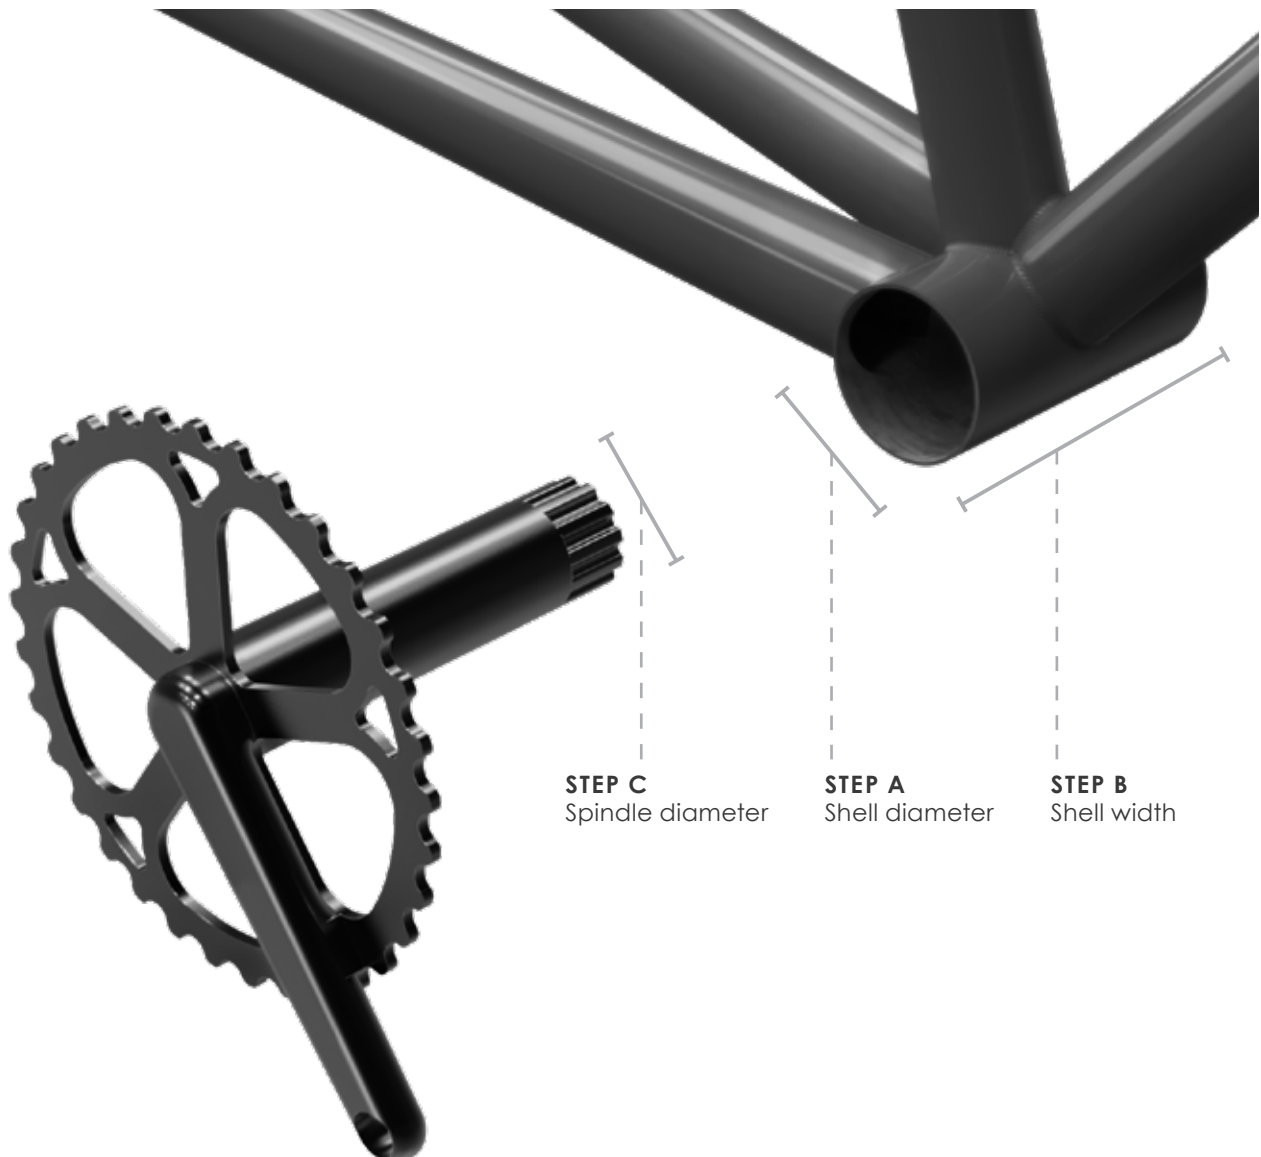

The most common thread types in thread fit shells are BSA (English thread), ITA (Italian thread) and T47 (M47×1). A thread type bottom bracket is interlocked directly with the shell. Press fit shells come in various diameters and widths, most commonly PF30 (Ø46mm), BB30 (Ø42mm) and BB86/92 (Ø41mm). Press fit bottom brackets are pressed into the shell using a press-in tool.

Another dimension you need to know in order to select a fitting bottom bracket is the spindle

diameter. Different brands and models can vary widely, from Ø30mm to tapered versions like Praxis (Ø30mm – Ø28mm). Differences between brands can also be as little as a few hundreds of millimeters.

Elvedes offers a basic range of bottom brackets, which can be easily adapted to specific types of spindles such as FSA Mega Exo and SRAM / Truvativ GXP using specific bearing caps or reducer kits.

Elvedes also offers an enhanced version of the press fit bottom bracket, called the twist fit bottom bracket. The twist fit bottom bracket can alternatively be used in a press fit shell. Replacement bearings and bearing caps are also available for maintenance.

# TWIST FIT —

## ELVEDES ALWAYS STRIVES TO SUPPLY IN SOLUTIONS.

A common issue of the classic press fit bottom brackets is a squeaking and creaking sound because of a bad bearing alignment.

Press fit bottom brackets exist of three pieces which are independently pressed into the shell using a press-in tool. It often occurs that the left and right bearing are not 100% in line. This causes pressure on the bearings, wearing them out easily.

A solution to this problem is the Elvedes twist fit bottom bracket. This improved version of a press fit bottom bracket exists of two easily installed interlocking cups to create one rigid bracket in which the bearings are perfectly aligned. This makes sure the spindle can run without any sideways pressure, lifting both friction and creaking sounds.

The Elvedes CNC twist fit bottom brackets come in all sizes and can be used instead of regular press fit bottom brackets to bring your cycling experience to the next level. Once installed, the bearings can easily be replaced for maintenance while the bottom bracket stays in place. This saves a lot of time and keeps the costs low over time.

To assemble the Elvedes Twist Fit you will need the Elvedes Bottom Bracket Wrench (item no. 2018086 or the Elvedes Twist Fit Tool Kit (item no. 2018087)

### — LOW MAINTENANCE COSTS

Only the bearings can be replaced for service maintenance, while the bracket stays in place.

### — PERFECTLY IN LINE

The threaded interlocking cups allow the spindle to run freely without squeaking and creaking.

### — EASY INSTALLATION

Elvedes BB wrench required (item no. 2018086)

Scan the QR code for an online manual for (dis)assembling Elvedes twist fit bottom brackets using Twist fit tool kit.

## SNAP-ON CROWS FOOT 8 MM

2020094

For compression bolts (8 mm)  
Fits 1/4" torque wrench

## END PRESS

2017159

For fast and easily pressing inserts and banjos into hydraulic hose

Not suitable for Magura HS11/33

2018112  
Spare insert driver

## OPEN RING WRENCH 7 / 8

2017056

Specially designed for Shimano bleed bolt (7 mm)  
For easy access to compression bolts (8 mm)

## HOSE CUTTER BASIC

2019042

For smooth and burr-free cutted hydraulic hose  
Prevents leakage and damage of the hose

For consumer use

Spare blade included inside

## HOSE CUTTER PROFESSIONAL

2019124

For smooth and burr-free cutted hydraulic hose  
Prevents leakage and damage of the hose

For professional use

2019232  
Spare blade

## TWIST FIT TOOL KIT

2018087

Tool kit to (dis)assemble all Elvedes twist fit, thread fit and SRAM DUB bottom brackets.

Dimensions casing:  
36 × 27 × 7,5 cm

## BEARING SERVICE KIT

2018088

Tool kit to (dis)assemble bottom bracket bearings

Dimensions casing:  
22,5 × 11,5 × 4 cm

## BOTTOM BRACKET WRENCH

2018086

Bottom bracket wrench for all Elvedes twist fit and thread fit systems

16 notch / 44 mm  
12 notch / 48,5 mm

## SRAM DUB TOOL ADAPTER

2019069

For Elvedes Twist fit and thread fit and original SRAM DUB
